

NAXXAR
TECHNOLOGY

**Powering End-To-End Sustainability,
Visibility, And Security For Global Trade.**

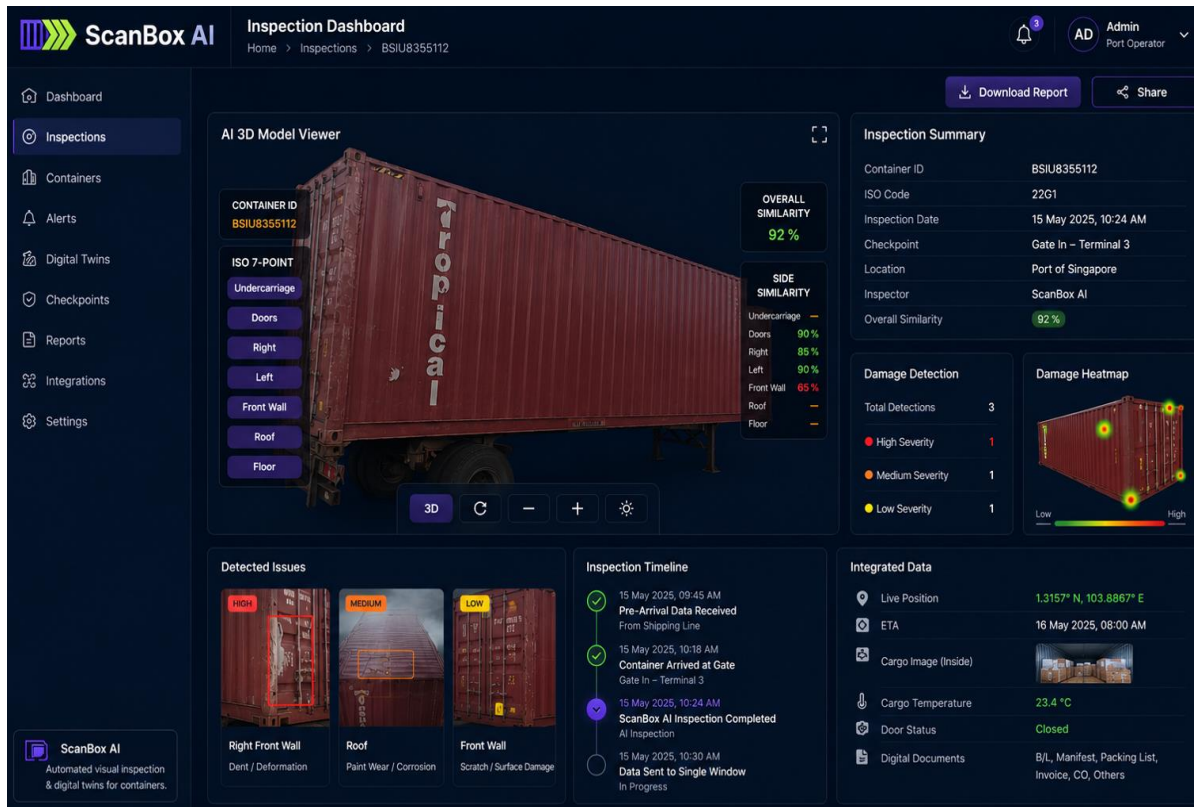

ScanBoX AI

- **Shipment MRV:** Real-time GPS tracking, ETA's & security alerts.
- **Emission MRV:** Real-time CO2e shipment data monitoring.
- **Cargo MRV:** Real-time cargo condition monitoring, temperature, shock, cargo inspections time stamped and geolocated by smart phone anywhere in the world.

Naxxar Tech: Monitoring Reporting & Verification 'MRV'

➤ **AI container inspection:** AI inspection from CCTV images of each container at gates or inspection lanes with minimal manual effort.

➤ **AI digital Twin:** Automatically detects and characterise damage, creating a digital twin for container.

➤ **AI security verification:** AI Two factor Authentication for terminal operating systems & single widow.

ScanBox AI : AI inspection & Digital Twin

NAXXAR

TECHNOLOGY

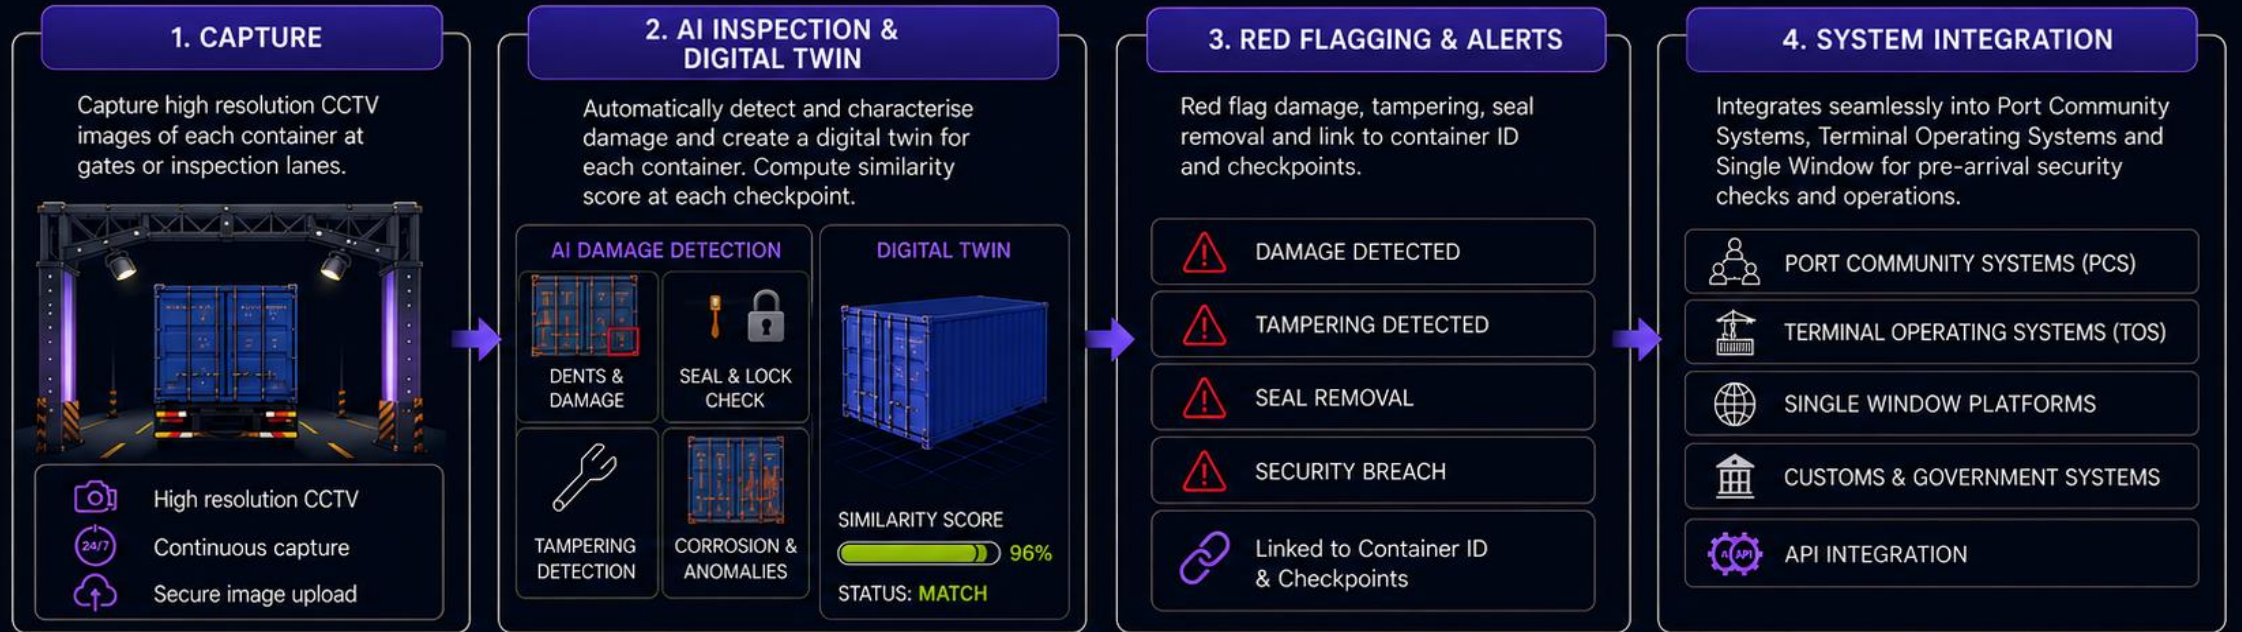

GLOBAL SHIPMENT INTELLIGENCE MONITORING. REPORTING. VERIFICATION.

AUTOMATED AI VISUAL INSPECTION DIGITAL TWIN OF CONTAINER

Intelligent Inspection. Real-time Insights. Smarter Security.

SCANBOX AI DELIVERS

ENHANCED SECURITY

Detect damage, tampering & seal removal in real-time

OPERATIONAL EFFICIENCY

Automated inspections reduce delays and manual checks

DATA ACCURACY

Trusted digital records linked to container ID & checkpoints

GLOBAL VISIBILITY

Digital twin accessible across ports & systems

FUTURE READY

AI-powered, scalable and easy to integrate

ScanBox AI

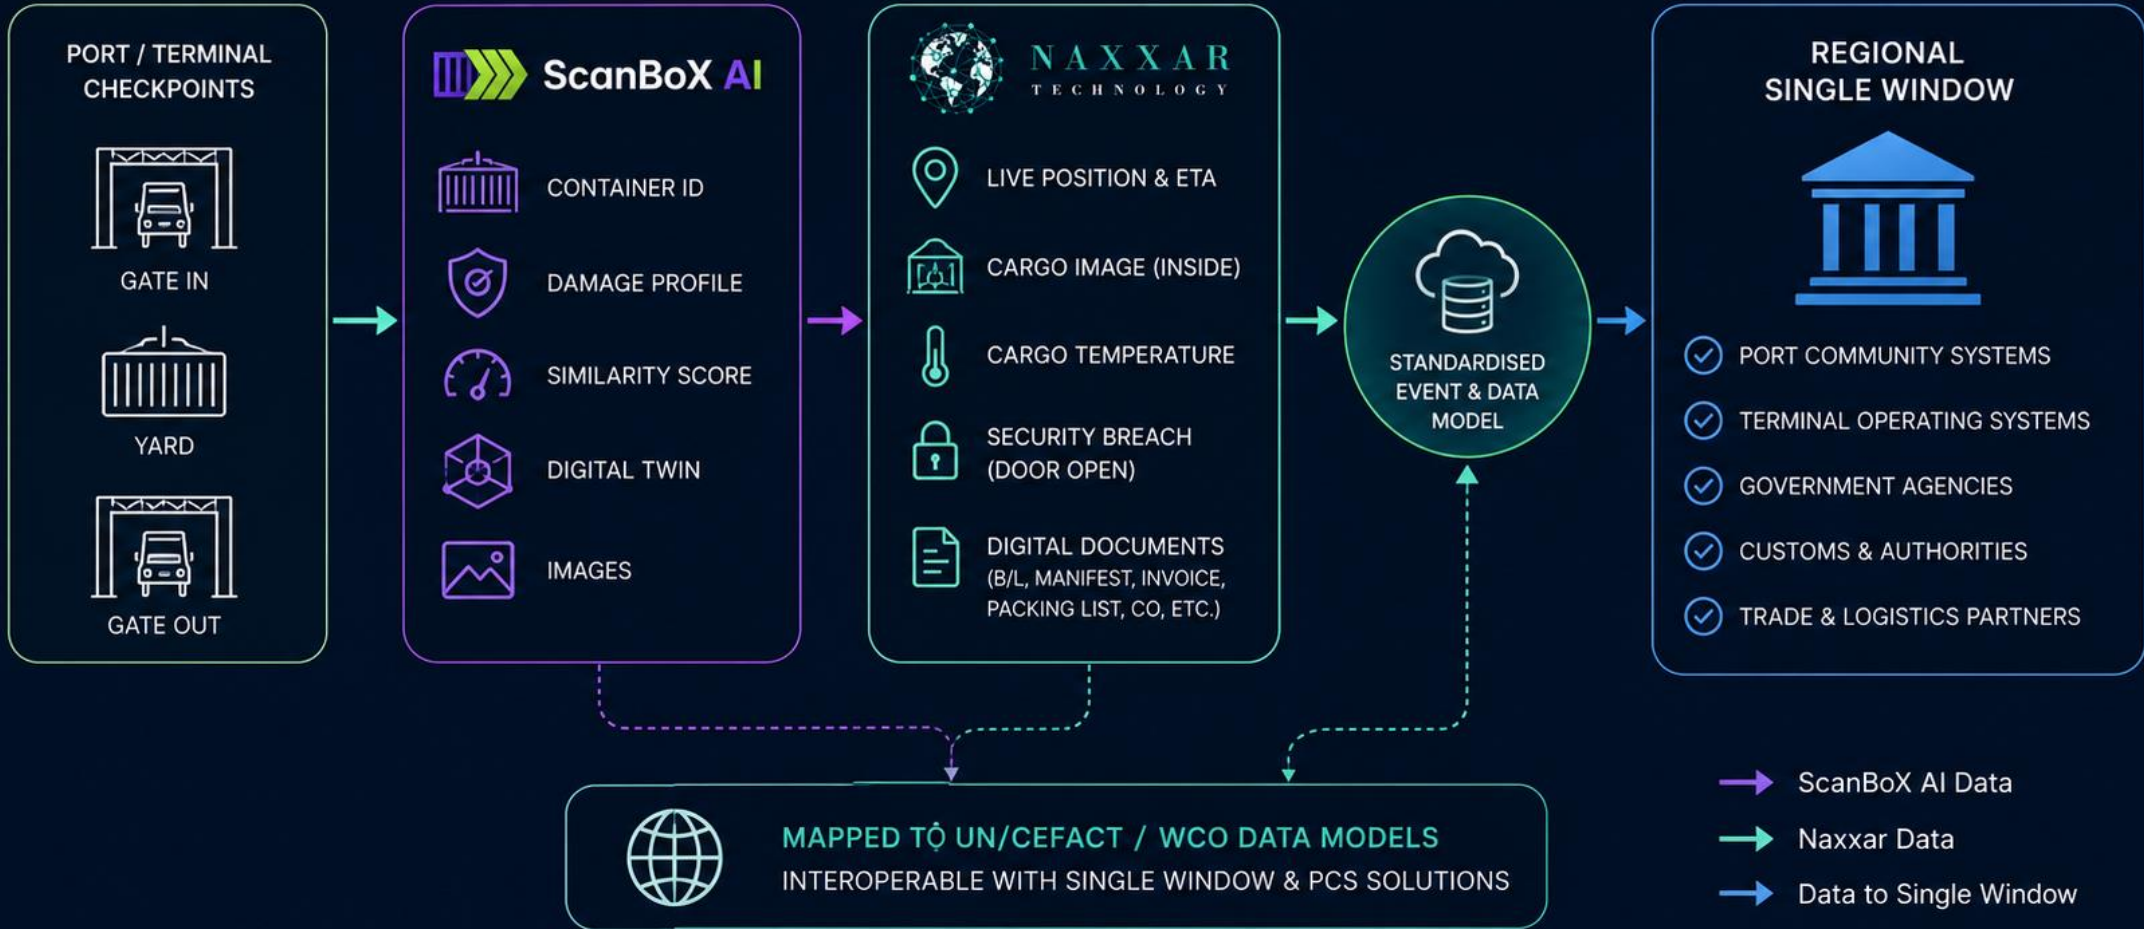

Transforming container inspections with AI-powered vision and digital twins.
