

Featuring:

Webinar on Navigating Energy Transition: Pathways for Ports

Date: Thursday, October 22, 2026

Time: 12:00 PM – 13:30 PM Washington D.C.

The webinar, organized by the Secretariat of the Inter-American Committee on Ports (CIP) of the Organization of American States (OAS) in collaboration with the Women's International Shipping & Trading Association in Peru (WISTA Peru), will feature the participation of the National Ports Administration (ANP) of Uruguay, DP World in Peru, and the National Federation of Port Operations (FENOP) of Brazil. This webinar will address the strategic role of ports in the energy transition and the opportunities this process presents for strengthening the competitiveness, sustainability, and resilience of the maritime-port sector. Drawing on the expertise of international experts, the webinar will analyze key trends in decarbonization, the adoption of clean fuels and technologies, the development of sustainable port infrastructure, and the financing and innovation mechanisms that are driving the energy transformation of ports. In addition, best practices and success stories will be shared to help port authorities and industry stakeholders prepare for the challenges and capitalize on the opportunities of a low-carbon maritime economy.

Agenda

12:00 – 12:10 **Opening Remarks**

Jorge Durán, Chief of the Secretariat, CIP-OAS
