

**FEATURING:**

**Webinar on Disaster Risk Management Strategies:  
A Comprehensive Approach to Emergency Preparedness and Response**

**Date:** Thursday, April 13, 2022

**Time:** 11:00 AM EDT (9:00 AM CST)

The Webinar, organized by the Secretariat of the Inter-American Committee on Ports (CIP) of the Organization of American States (OAS), will present different perspectives of disaster risk management from CIP Associate Members and Strategic Partners dedicated to safeguarding and increasing resilience of ports and communities from natural and anthropogenic disasters. Representatives from Amazon Web Services and HudsonAnalytix, will share views regarding implementation of successful emergency response strategies that promote preparedness, efficient relief efforts and minimal loss. The Webinar will also provide an executive project status presentation of the CIP Improved Disaster Risk Management for Ports in the Caribbean Project. The presentations will be followed by a Q&A session.
