**Webinar on Sustainable Operations:  
Decarbonization of the Port-Maritime Sector Part II (English)**

**Date:** Monday, November 25, 2024

**Time:** 12:00 PM Washington D.C.

The Webinar, organized by the Secretariat of the Inter-American Committee on Ports (CIP) of the Organization of American States (OAS), in collaboration with the Institute of the Americas (IOA) will bring together a group of experts on sustainable operations and environmental protection, who will share knowledge, ideas and experiences through an open, dynamic and interactive dialogue.

Experts from Barbados Port Inc., Port of Açú and National Port System Administration (ASIPONA) of Manzanillo will be presenting successful practices address the current challenges, trends, emerging technologies, and green actions that catalyze the decarbonization of the port-maritime sector. In addition, experts will share from their perspective key aspects for advancing green transitions in Latin America and the Caribbean.

This is the second webinar organized by the CIP Secretariat and the IOA in the context of the Memorandum of Understanding between the IOA and the General Secretariat of the OAS. For more information on the first discussion, please click [here](#).
