

FEATURING:

## Webinar on Building Port Resilience: Strategies for Risk Management and Emergency Response

**Date:** Tuesday, April 22, 2025

**Time:** 12:00 PM Washington D.C.

In an increasingly complex and uncertain global landscape, ports face multifaceted challenges that threaten their operational continuity and security. This webinar, organized by the Secretariat of the Inter-American Committee on Ports (CIP) of the Organization of American States (OAS) in collaboration with Barbados Port Inc. (BPI), will delve into innovative strategies and best practices for enhancing port resilience against physical, environmental and cyber risks. This webinar will feature experts from HudsonAnalytix of the United States, the Port Authority of Trinidad and Tobago (PATT), and MIS Marine of the United Kingdom.

Experts will explore effective risk management frameworks, emergency response protocols, training and cutting-edge technologies that bolster real-time threat detection and crisis management. Additionally, the session will highlight the importance of collaboration between port authorities, government agencies, and private stakeholders to ensure seamless recovery and long-term sustainability in the face of evolving threats.
